

MRE MULTI SWEEP

725 Series Sweeper Collector

725 Series Sweeper Collector

Model 725 complete with gravity water system powered off the hydraulic service of the material handler.

- Collects as it sweeps.
- Quick and easy method of attachment.
- Robust compact design.
- Permanently on site ready for instant use
- Suitable for collecting fine sand, dust, mud, brick or general debris.
- Various attachments available.

Multisweep is the cost effective alternative to sweeping by hand and is very effective at sweeping tougher outside applications, the Multisweep can be powered by the forklift, loader, and tractor or by an independent petrol, diesel or LPG power pack.

The Multisweep attaches using the forks on a loader or forklift and by using the 3 point linkage on a tractor. Quick hitch plates are available for some brands of telescopic forklifts.

Model 725 complete with twin side brushes, gravity water system and powered by a diesel power pack.

725 Series Sweeper Collector

MRE MULTI SWEEP

The front wheel mounting structures are reinforced using box steel, which carry our kingpin wheel arrangement. The front wheel diameter is 16", which is made of a steel casing and rubber rim. This gives excellent manoeuvrability and strength.

The large capacity debris container is opened manual or hydraulically from within the cab. It is then closed simply by lowering the MultiSweep while moving forward as it makes contact with the ground.

The Side/Kerb Brush is made up of polypropylene and flat steel blades which are extremely effective at removing weeds, moss or other lodged debris from a kerbed or walled area.

An independent power pack can be supplied as an alternative power source. The unit comes complete with engine, pump and hydraulic reservoir. This allows the Multisweep to be used by any material handler with forks.

MODEL	UNLADDED WEIGHT	WATER TANKS FULL	DEBRIS CONTAINER FILLED (SAND)
725 including water tanks	840kgs (1852lbs)	990kgs (2182lbs)	1330kgs (2932lbs)
