Model 900 complete with twin tank gravity water and twin side brushes.

MultiSweep is a cost effective alternative to sweeping by hand and is very effective at sweeping tougher outside applications, the Multisweep can be powered by the loader, forklift or by using its own independent power pack in gasoline, diesel or LPG. The Multisweep attaches using the forks on a loader or forklift. Quick hitch coupling plate can be supplied upon request

900 Series Sweeper Collector

MRE MULTI SWEEP

The front wheel mounting structures are reinforced using box steel, which carry our kingpin wheel arrangement. The front pneumatic wheels have a 16" diameter which is made of a steel split rim casing. A solid wheel is also available.

A water system allows for control of dust while sweeping. A choice of gravity feed, power hydraulic or electric power spray are available with 200 litre (54 Gallons) of water capacity.

The Side/Kerb Brush is made up of polypropylene and flat steel blades which are extremely effective at removing weeds, moss or other lodged debris from a kerbed or walled area.

An independent power pack can be supplied as an alternative power source. The unit comes complete with engine, pump and hydraulic reservoir. This allows the Multisweep to be used by any material handler with forks.
